

c.cpp

```
1  #include <iostream>
2  using namespace std;
3
4  double power(double n, int p=2){
5      double result=1;
6      while(p!=0){
7          result*=n;
8          p--;
9      }
10     return result;
11 }
12
13 int main()
14 {
15     cout << power(4, 3);
16 }
17
18
```
